

The debt-mechanic features do most of the separating

Left: cluster-recovery scores, 0–1. Right: count of households

■ Honest behavioural features

■ Plus debt-mechanic proxies

Agreement with the true labels

Households by archetype and cluster

	Cluster 0	Cluster 1	Cluster 2
Climber	7	71	8
Chronic	8	31	5
Subsister	0	0	37

Both indices are chance-corrected, so 0 means no better than a random partition. Cluster numbering is arbitrary and carries no ordering.
